Bootstrap

Bootstrap is a library from Twitter that is free to use and provides 3 valuable features:
1. Vast CSS for almost anything you can think of
2. Javascript components that don't require javascript coding
3. Grid system

bootstrap is a mobile-first design library.

Mobile-first -
When we developed the layout (kittens) page, we designed the desktop app first, and then, using a @media tag, designed the mobile version.

According to the mobile-first methodology, we should start with the mobile design, and only then design the desktop version
